

NICHOLAS PIASKOSKI

Experience

Piegyu Designs

Sept. 2017 to Current
Asheville, NC

Full stack web development work by contract.

- Tech Talent South - Instructor for 4 of their Code Immersion courses in Asheville covering Ruby and Rails. HTML, CSS, JS, jQuery, Bootstrap and SQLite are also covered. Lead full-time students through 3 major projects and provide issue support for their independent projects. Update curriculum to support new version releases. See my reviews: 1, 2, 3 & 4
- Madison County Economic Development Office - Create and build a web page advertising Tech Town Showcase.
- Sunshine Farm - Create and build a website for a dog breeder.
- dmarcian - Develop rules for DMARC authentication of email.

Verizon Wireless Operations Specialist

Aug. 2004 to May 2017
Waynesville, NC

- Created a bar code generator with output readable by inventory scanners to account for a new program where we were purchasing serialized equipment that did not have SKUs. Saved the company \$15M over the course of a year through greater inventory accuracy and decreasing the processing time for that inventory at 1700 retail locations.
- Created a fix to refactor an outdated feature in the Point Of Sale system, which was causing stores to send back no value items to the national warehouse. Saved the company \$17M over the period of three years by eliminating shipping costs and processing times at 1700 retail locations and the national warehouse.
- Earned a Leading performance rating 6 out of 7 years in my role as Operations Specialist. This is the highest performance rating and only 5% of employees earn this rating.

Volunteer Work

Avl Developers Network & Avl Coders League · Founder & Organizer

Dec. 2017 to
Current

Schedule and organize technical speaker series for two coding groups in the Asheville area all supported with time and effort donated from local businesses and the coding community. ADN & ACL

WWOOF USA · Host

Mar. 2007 to May 2017

Mentor and host to aspiring organic farmers through the organization World Wide Opportunities on Organic Farms. Interns lived and worked on my homestead farm for anywhere from two weeks to six months, learning about organic growing and living more sustainably.
